

- 1. Consider in advance the purpose of your Disaster Recovery Plan, and what falls inside and outside -the scope of this plan.
- 2. Map out what IT systems and IT dependencies exist for the organisation.
- 3. Determine the Recovery Time Objective (RTO) for critical applications and the Recovery Point Objective (RPO) for critical data.
- 4. Examine the current backup schedule and whether this fits the RTO and RPO.
- 5. Make sure that the Disaster Recovery Plan focuses on those systems necessary to the continuation of critical processes. Otherwise, there's a chance the DR plan will prioritise non-critical matters.
- 6. Describe possible disruptions and the associated Disaster Recovery strategies: what action do you take for what IT system disruption.
- 7. Describe the Disaster Recovery procedures and map out:
  - What steps need to be taken?
  - What parties are involved and where do responsibilities lie?
  - How long does the step to be taken need?
  - What are the necessary components?

Do this for each phase (response, restart and restore) and for each potential disruption separately. Use a clearly-understandable table for this (see example on page 4).

- 8. Create a contact list for all your Disaster Recovery contacts and make it part of y our disaster recovery plan.
- 9. Make sure the DR plan is short, clear and up to date.
- Designate a document owner. He/she will keep track of revisions and updates of the DR plan, and will ensure that all parties involved have access to the latest version.
- 11. Test your Disaster Recovery Plan, or parts of it, regularly.

## Sample table:

| Step | Owner | Duration | Components |
|------|-------|----------|------------|
|      |       |          |            |
|      |       |          |            |
|      |       |          |            |
|      |       |          |            |
|      |       |          |            |
|      |       |          |            |
|      |       |          |            |
|      |       |          |            |
|      |       |          |            |
|      |       |          |            |
|      |       |          |            |
|      |       |          |            |
|      |       |          |            |
|      |       |          |            |
|      |       |          |            |
